

ABOUT ME:

Aspiring Data Scientist with a strong foundation in Python, Machine Learning, and Data Analytics. Skilled in problem-solving and data-driven decision-making through academic projects. Eager to apply technical expertise, contribute to innovative solutions, and continuously enhance professional skills in a dynamic environment.

INTERNSHIP:

IBM (via AdroIT Technologies Innovative Solutions Pvt. Ltd.) Dec 2025 – Feb 2026

- Collaborated in project activities and participated in Agile stand-up meetings.
- Gained hands-on exposure to industry practices and project development workflows.

Virtual Internship – AI/ML (Computer Vision) Jan 2026

- Applied computer vision and image processing concepts using AI/ML techniques.
- Developed practical knowledge of image analysis and machine learning applications.

CodSoft – Artificial Intelligence Intern Jul 2025 – Aug 2025

- Completed a 4-week virtual internship focused on Artificial Intelligence.
- Developed AI-based solutions and enhanced problem-solving skills through hands-on projects.

PROJECTS:

PROJECT - 1:

Disaster Management & Alert System February 2026 – April 2026

Developed a full-stack web application to manage disaster alerts, emergency notifications, and district-wise incident tracking through role-based user access.

Roles & Responsibilities:

- Developed backend functionalities using Spring Boot.
- Implemented role-based access control for Admin and Citizen users.
- Integrated MySQL database for data storage and retrieval.
- Developed alert management and emergency notification features.

Skills Used: Java, Spring Boot, MySQL, HTML, CSS, JavaScript

GitHub: <https://github.com/Poorni2k/Disaster-Management-Alert-System->

PROJECT - 2:

Handwritten Digit Recognition Using Neural Networks Sept 2025 – Nov 2025

Developed a machine learning model to recognize and classify handwritten digits (0–9), achieving 96% accuracy.

Roles & Responsibilities:

- Performed data preprocessing and model training.
- Developed and optimized a neural network model for digit classification.
- Evaluated model performance and validated prediction accuracy.

Skills Used: Python, TensorFlow/Keras, NumPy, Pandas, Matplotlib

GitHub: <https://github.com/Poorni2k/Disaster-Management-Alert-System->

PROJECT - 3:

Student Management System Jan 2025 – April 2025

Developed a database-driven application to manage student records efficiently through CRUD operations.

Roles & Responsibilities:

- Designed and developed the application and database structure.
- Implemented CRUD functionalities for student record management.
- Managed database connectivity and data validation.

Skills Used: Python, MySQL

GitHub: <https://github.com/Poorni2k/Student-management-ibm>

SKILLS:

- | | |
|--------------|----------------|
| • Python | • PowerBI |
| • Java | • React,Numby |
| • JavaScript | • Partas |
| • SQL | • Jira |
| • Tablew | • AWS, Postman |

EDUCATION:

- **Bachelor Of Technology (Artificial Intelligence and Machine Learning)- 2023 to 2027**
 - Velammal Institute Of Technology

CERTIFICATIONS:

NPTEL :

Java Programming

IBM :

Data Visualization Using Python

Infosys Springboard :

- Machine Learning
- Cloud Computing
- Design Thinking

Forage:

Data Visualization: Empowering Business with Effective Insigh
